

# EQUALIZING THE GRADUATE EXPERIENCE FOR **ALL** STUDENTS

## Three Types of Support

# The modern graduate student fits their dissertation or thesis into the rest of their lives

**You know the graduate students who need extra support.**

They are older, or working full time and online or at a distance. They may be in the military or speaking another language at home. These students finish all the classes but bog down during independent research at the end.

Have you asked yourself, “Why?”

Research indicates key factors are fewer opportunities for university socialization that came with being on campus. If a university can't address students' needs, 24/7 it becomes increasingly likely that other responsibilities may take precedence over their degree completion because the dissertation has a lower priority in their lives.

It is no wonder that online student statistics typically show completion drops below the 50% average for on campus public programs.

**It's no longer enough to have one or even two ways of delivering guidance – today's student requires systems that can deliver the aid they need, relevant to where they are as individuals**, in the research process. Higher education needs to develop multiple ways and means of engaging students during their studies, personalized for each type of need.

**We all want graduate students to see such strong progress that they weather their personal traumas and still graduate.**

DoctoralNet's goal is to show you how technology allows you to deliver this type of sophisticated interactive technology to your graduate students.

**DoctoralNet brings the socialization of your campus to your online, distance students or those who work full time.**

**DOCTORAL  
NET**

# How does DoctoralNet upgrade your university's offerings to your Graduate Students?

## 3 ways...

### 1. By helping students avoid loss of time and forward progress through a suite of self guided systems.

1. **Milestones** help them keep track of progress
2. **Maps** synced to milestones aid them finding guidance quickly as they need it.
3. Content-linked maps available through **multiple delivery systems** for the adult learner.

### 2. By ensuring solid research design and cut back on 1:1 sessions required with advisors/mentors or research supervisors.

1. **Personalized guidance on research design is achieved through DoctoralNet's proprietary automations©**
2. **Self assessment of outcomes against research standards available 24/7.**

*"If you just follow the game plan as it is laid out on the DoctoralNet site - it is foolproof. You have to follow it, you have to do your due diligence but you can rest assured this system will get you through your dissertation or thesis, as a former student I can tell you, it is guaranteed."*

Dr Juliette Brown

### 3. By helping to socialize graduate students at a distance from your university campus by ensuring that their online environment is as rich in conversation as walking down the halls of your buildings.

1. **Daily push notifications** delivered through email to the students device of choice enrich and motivate.
2. **Online groups** allow for international research camaraderie.
3. **80+ webinars a year** unpack the subtleties of the dissertation or thesis process.

# DOCTORALNET'S LEVEL OF DETAIL IN GRADUATE RESEARCH GUIDANCE TECHNOLOGY TOOK YEARS TO DEVELOP...

As your university partner we remain committed to scanning the technology landscape and keeping current as new options develop.  
**THIS MEANS YOU DON'T HAVE TO,**  
Yet you always deliver current services to your students

Will this technology work to retain students and allow higher percentages to complete their graduate degrees?

It is the mission of DoctoralNet Ltd to help do just that.

**85%, of the 42 doctoral students who advised us in the design of the technology, graduated in 3.5 years, 100% in 5 years rather than 50% in 5 years as is the average.**

DoctoralNet's business model is to:

1. Sell subscriptions to universities to upgrade their offerings,
2. Work to engage all students with these technologies
3. Continually enhancing student outcomes

**until everyone enjoys support comparable to the university experience full time, on campus from an ivy league or top ranked research university.**

Technology now available for Masters Research as well
